Date of incorporation/establishment:	12 December 2003

HISTORY

Law No. 1270 of 17 May 1863 originally established Cassa depositi e prestiti through the merger of several financial institutions into the Public Debt General Department (*Direzione Generale del Debito Pubblico*). For approximately one century, Cassa depositi e prestiti was a General Department of the Ministry of Treasury of the Republic of Italy, however with financial and accounting autonomy from the Italian State. Pursuant to Law No. 197 of 13 May 1983, the General Department was abolished and Cassa depositi e prestiti was set up as an independent administration (*amministrazione autonoma*). Legislative Decree No. 284 of 30 July 1999 reformed Cassa depositi e prestiti and classified it as a national public body (*amministrazione dello Stato*) with legal status and regulatory, organisational, economic and accounting autonomy.

Pursuant to paragraph 1 of Article 5 of Italian Law Decree No. 269 of 30 September 2003, as converted with amendments into Law No. 326 of 24 November 2003 (**Article 5**), *Cassa depositi e prestiti* was transformed and incorporated, as of 12 December 2003, as a joint stock company under the name of “*Cassa depositi e prestiti società per azioni*” and all assets, liabilities, rights and obligations owned by or owed to *Cassa depositi e prestiti* prior to its transformation into a joint stock company were transferred to CDP, with the exception of certain assets and liabilities which were transferred to the Ministry of Economy and Finance (the **MEF**), in accordance with the provisions of Article 5.

The duration of CDP, pursuant to article 4 of CDP's by-laws (the **CDP By-Laws**), is set until 31 December 2100, unless otherwise extended by shareholders' resolution.

In 2015, CDP was appointed by the Italian Government as National Promotion Entity (*Istituto Nazionale per la Promozione*) according to article 1, paragraph 826 of Law No. 208 of 28 December 2015 (the **Stability Law**) and the relevant EU law applicable.

The Separate Account System is established for accounting and organisation purposes only, so that from a legal point of view CDP remains a single legal entity and any creditors of CDP may recover their claims by attaching all of CDP's assets (except for those segregated in favour of certain creditors only pursuant to paragraph 18 of Article 5).

The Separate Account System is managed in line with transparency and economic safeguard criteria. Article 6 of the CDP By-Laws specifies that for the operations referred to in letter (A2) of article 3 of the CDP By-Laws the economic and financial sustainability of each project shall be assessed.

Such organisational and accounting separation aims at highlighting the economic balance of the Separate Account System and at enabling the MEF to exercise its powers to issue guidelines thereon and ensure the compliance with the EU provisions on State Aids, competition and transparency.

Unless otherwise provided by law, save for certain limited exceptions, pursuant to paragraph 25 of Article 5, CDP is subject to the same tax provisions applicable to banks. RECENT EVENTS OF THE ISSUER

For complete information relating to corporate transactions and significant events in respect of the year ended 31 December 2015 and the six month period ended 30 June 2016 involving the Issuer, investors are advised to read carefully the relevant information contained in the audited separate and consolidated annual financial statements of the Issuer in respect of the year ended 31 December 2015 and in the consolidated interim financial statements of the CDP Group in respect of the six month period ended 30 June 2016, incorporated by reference into this Information Memorandum.

The following events are herein reported for completeness of information.

Share capital increase

On 24 June 2016, CDP's extraordinary shareholders' meeting approved a capital increase reserved for the MEF, in an amount, including a share premium, of € 2,930,257,785. On 20 October 2016, the capital increase was paid through the transfer to CDP by the MEF of a shareholding in Poste equal to 35% of the share capital. As a consequence of this transaction, CDP's share capital increased from €3,500,000,000 to €4,051,143,264, with a change of €551,143,264, carried out through the issue of 45,980,912 ordinary shares in favour of the MEF. The shares were subscribed by the MEF by transferring 457,138,500 Poste ordinary shares, representing 35% of share capital. To the amount of the capital increase was added €2,379,114,521 as a share premium. As a result of the transaction, the stake of the MEF in CDP increased from 80.1% to 82.8% of the share capital. CDP's shareholding in Poste was assigned to the Separate Account System, whilst the management activity relating to such shareholding is still exercised by the MEF.

Litigation with Fondazione Cassa di Risparmio di Verona Vicenza Belluno e Ancona

During the course of 2013 Fondazione Cassa di Risparmio di Verona Vicenza Belluno e Ancona has called CDP before the Court of Rome in relation to the process of conversion of CDP preferred shares in ordinary shares and the subsequent withdrawal by such banking trust from CDP's share capital. The request made to CDP is equal to Euro 431,890,854.00. The legal panel defending CDP has represented that the risk of losing the case in respect of the first instance proceedings, already deemed as possible, has become probable. However, such legal panel deems as reasonable the forecasting of winning the case, considering the entire proceedings (i.e. the possibility of filing an appeal) and the fact that its arguments are well-grounded.

Moody's and Fitch's changes in their ratings

On 28 October 2016, rating agency Fitch changed the outlook on CDP from stable to negative. The long and short-term ratings were affirmed at BBB+/F2.

On 9 December 2016, rating agency Moody's changed the outlook on CDP from stable to negative. The long and short-term ratings on CDP were affirmed at Baa2.

2016-2020 Business Plan approval

On 17 December 2015, the Board of Directors approved the business plan for the period from 2016 to 2020 (the **2016-2020 Business Plan**).

CDP will act to sustain the national intervention, by pursuing a systemic and countercyclical approach, working with a long-term perspective and in a context of sustainability, as a market player would act. CDP aims at overcoming market limitations and acting to complete the activities of the existent market players.

CDP Group's ambition is to play a key role in Italy's growth, by intervening in all key sectors of the economic development. In the period 2016-2020, CDP Group could provide to Italy new assets up to approximately €160 billion, adopting a strategy based on four different business cornerstones: (i) *Government and PA, Infrastructure*; (ii) *Internationalisation*; (iii) *Enterprises*; and (iv) *Real Estate*.

Government and Public Administration, Infrastructure (€39 billion): in respect of the *Government and Public Administration* sector, by using approximately €15 billion, the aim is to intervene through: the reinforcement of the public finance activities, the valorisation of public assets, a new role in the context of international cooperation and a direct action to optimise the management of the European structural funds and to accelerate the relevant access by the entitled entities, also in light of the appointment of CDP as National Promotion Entity (*Istituto Nazionale per la Promozione*). In respect of the *Infrastructure* sector, the aim will be to support a "step change" in the realisation of infrastructural projects by favouring the revitalisation of big infrastructures and identifying new strategies for the development of the small infrastructures (by using approximately €24 billion).

Internationalisation (€63 billion): the support to the export and the internationalisation will be significantly improved through the creation of a sole presidium and a sole access point to the Group's services and a revision of the offer of such services according to a logic of optimisation of the relevant support.

Enterprises (€54 billion): CDP Group will support Italian enterprises during all their life cycle, activating interventions to favour the growth, the innovation and the development of the enterprises and the supply chains by facilitating the access to credit. The Group's role in the valorisation of the assets of national relevance will be affirmed through a management of the shareholdings having a systemic relevance in a long-term perspective and a support to the enterprises by granting capital for their growth.

Real Estate (€4 billion): CDP's ambition is to contribute to the development of the real estate assets through: interventions aimed at the valorisation of the instrumental buildings of the Public Administration, the development of a new model of affordable housing and the creation of a space for the social inclusion, the

realisation of requalification projects and the urban development in strategic areas of Italy and the valorisation of the receptive structures, also assessing the possibility of intervention in ancillary assets to support the tourism sector.

The resources that CDP will invest, will act as a pole of attraction for the investment of resources by private entities, territorial and supranational entities, and international investors, granting the channelling of further €105 billion. The total of approximately €265 billion activated will support an important share of the Italian economy.

CERTIFICATION OF INFORMATION

Persons responsible for the Information Memorandum

Cassa depositi e prestiti S.p.A. as Issuer is the entity responsible for the information contained in this Information Memorandum.

Declaration of responsibility

Cassa depositi e prestiti S.p.A. as Issuer has confirmed that, to its knowledge, the information contained in this Information Memorandum is true and does not contain any omission which would make it misleading.

RISK FACTORS

The Issuer believes that the following risk factors may affect their ability to fulfil its obligations under the Instruments issued under the Programme. Most of these risk factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring. In addition, risk factors which are material for the purpose of assessing the market risks associated with the Instruments issued under the Programme are also described below.

The Issuer believes that the risk factors described below represent the principal risks inherent in investing in Instruments issued under the Programme, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with any Instruments may occur for other reasons which may not be considered significant risks by the Issuer based on information currently available to them or which they may not currently be able to anticipate. Accordingly, the Issuer does not represent that the statements below regarding the risk of holding any Instruments are exhaustive.

Prospective investors should also read the detailed information set out elsewhere in this Information Memorandum and reach their own views prior to making any investment decision.

Factors that may affect the Issuer's ability to fulfil their obligations under the Instruments issued under the Programme

Issuer's ability to meet its obligations under the Instruments

No security interest has been created by CDP for the benefit of the holders of the Instruments for their claims under the Instruments, nor will any guarantee be issued by the Republic of Italy in favour of the Instrumentholders. Consequently, the Issuer will meet its payment obligations under the Instruments primarily through the results of its business activities. Instrumentholders will have access to all assets of CDP to satisfy their claims under the Instruments, other than assets segregated by CDP in favour of certain creditors of CDP, pursuant to paragraph 18 of Article 5. See further details on segregated asset under "Segregated Assets of CDP" below.

Segregated Assets of CDP

CDP may segregate any of its assets, in whole or in part, in favour of the holders of asset-backed securities issued thereby or in favour of other lenders of CDP. In particular, pursuant to paragraph 18 of Article 5, upon segregation, the assets may be attached only by the holders of the asset-backed securities or other lenders identified by CDP and constitute separate assets in all respects from that of CDP until final discharge of their rights against CDP. In addition, notwithstanding the provisions of article 2447-bis, letter (a) of the Italian Civil Code on the segregation of assets by joint stock companies to specific businesses, the segregation of assets upon which CDP may resolve, is not subject to any limit sets by law.

Existing Indebtedness

As of 30 June 2016, the total gross financial debt of the Issuer amounted to Euro 346,250 million, of which Euro 251,429 million was represented by postal savings accounts and interest bearing postal bonds issued by the Issuer. The obligations of the Issuer in respect of such accounts and bonds are guaranteed by the Republic of Italy. In the event of enforcement of the guarantee, pursuant to the provisions of the decree of the MEF of 6 October 2004, the Republic of Italy has conditioned its repayment rights against CDP to the absence of any prejudice to (i) the claims of public bodies or entities arising from the Separate Account System, (ii) the continuance of CDP's corporate activities carried out pursuant to paragraph 3, letter (a) of Article 5; and (iii) its title to the shareholdings transferred to CDP by the MEF at the time of its transformation in a joint stock company.

Rights of individual Instrumentholders

The right of each Instrumentholder to bring individual actions or use other individual remedies to enforce his/her own rights under the Instruments will be subject to the procedure provided by Condition 15.3. This could have a negative impact on the right of Instrumentholders to enforce their rights under the Instruments.

The sovereign debt crisis

CDP and its subsidiaries (the **CDP Group**) carry out their business activities mainly in Italy with public entities and, to a lesser extent, private entities, including banking groups operating in Italy. As such, the CDP Group's business is affected by the economic conditions affecting Italy, which, at the same time, are connected to European and global economic conditions.

The macroeconomic picture is currently characterised by important elements of uncertainty relating to: (i) the trends of the real economy in respect of the prospects of recovery and consolidation of the dynamics of national economy growth and the stability of economies of Countries such as the United States and China, who have shown a persistent growth in the past recent years, (ii) the future developments of the ECB and the FED monetary policies, respectively in the Euro area and the dollar area, together with the policies pursued by different Countries aimed at facilitating competitive depreciation of their currencies, (iii) the sustainability of the sovereign debt of certain countries and the related tensions, more or less recurring, in the financial markets, and (iv) the recent developments relating to the referendum held in the United Kingdom, following which the United Kingdom will leave the European Union ("*Brexit*"), not being foreseeable, at the moment, the impact the exit from the European Union will have on the economy of the United Kingdom, on international economy, on financial markets and on Italy's situation.

Furthermore, the sovereign debt crisis has raised concerns about the long-term sustainability of the European Monetary Union. In the last years, Greece, Ireland and Portugal have requested financial aid from European authorities and from the International Monetary Fund and are currently pursuing an ambitious programme of reforms. Cyprus has also requested financial help. While the risk of a sharp upward repricing in sovereign credit spreads has significantly diminished after the ECB launched the "Outright Monetary Transactions" (i.e. the direct acquisition, by the ECB, of short-term government bonds issued by countries heavily affected by the economic crisis), it has not completely faded.

In addition, such situation has raised concerns about the ordinary activity of many commercial and investment banks as well as insurance companies, some of which have become insolvent or have been forced to merge with other financial firms or have requested assistance from governments, central banks and international monetary funds which have intervened injecting liquidity into the economic system, also taking part to the restructuring of some financial entities. Moreover, other negative factors, such as increasing unemployment levels, have worsened the situation.

Persistent market tensions might affect negatively the funding costs and economic outlook of some euro member countries, including Italy. This, together with the risk that some countries (even if not very significant in terms of gross domestic product) might leave the euro area, would have a material and negative impact on Italy's sovereign debt and economic conditions and, therefore, on CDP and its operations.

Any deterioration of the Italian economy would have a material adverse effect on CDP, in light of the CDP Group's significant exposure to the Italian economy. Since the beginning of the sovereign debt crisis in May 2010, credit quality has generally declined, as reflected by downgrades suffered by several countries in the euro-zone, including Italy. The Issuer's credit ratings closely reflect the rating of the Republic of Italy and are therefore exposed to the risk of decline in the sovereign credit rating of Italy. Accordingly, on the basis of the methodologies used by rating agencies, further downgrades of Italy's credit rating may have a knock-on effect on the credit rating of Italian issuers, such as CDP. In this regard: on 28 October 2016, rating agency Fitch changed the outlook on CDP from stable to negative, and the long and short-term ratings were affirmed at BBB+/F2; on 9 December 2016, rating agency Moody's changed the outlook on CDP from

stable to negative and the long and short-term ratings on CDP were affirmed at Baa2; and on 20 December 2016, rating agency Standard and Poor's affirmed the long-term rating on CDP at BBB- and the outlook as stable.

Despite the several initiatives of supranational organisations to deal with the heightened sovereign debt crisis in the euro area, global markets remain characterised by high volatility. Any further acceleration of the European sovereign debt crisis could likely significantly affect, among other things, the recoverability and quality of the sovereign debt securities held by CDP.

Relationship with the Republic of Italy

The nature of CDP's business, as lender of funding to Italian public entities thereby providing a service of general economic interest, implies that, in addition to the risks connected with the need for renewal upon expiry of agreements and concessions, CDP bears the risks associated with its special relationship with the Italian government, which is CDP's main shareholder, and therefore may exercise a significant influence on CDP's operations.

Risks relating to the Instruments

The Instruments may not be a suitable investment for all investors

Each potential investor in the Instruments must determine the suitability of that investment in the light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Instruments, the merits and risks of investing in the Instruments and the information contained or incorporated by reference in this Information Memorandum or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Instruments and the impact the Instruments will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Instruments, including Instruments with principal or interest payable in one or more currencies, or where the currency for principal or interest payment is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Instruments and be familiar with the behaviour of any relevant indices and financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Risks related to the structure of a particular issue of the Instruments

Set out below is a description of the most common such features of the Instruments that may be issued under the Programme:

Interest Rate Risks

Investment in fixed rate Instruments involves the risk that subsequent changes in market interest rates may adversely affect the value of the fixed rate Instruments. Investment in floating rate Instruments involves the risk that interest rates may vary from time to time, resulting in variable interest payments to holders of the Instruments.

Instruments issued at a substantial discount or premium

The market values of securities issued at a substantial discount or premium from their principal amount tend to fluctuate more in relation to general changes in interest rates than prices for conventional interest bearing securities. Generally, the longer the remaining term of the securities, the greater the price volatility as compared to conventional interest-bearing securities with comparable maturities.

Set out below is a brief description of certain risks relating to the Instruments generally:

Liquidity Risk

Application will be made for the Instruments to be admitted to trading on the ExtraMOT PRO, the Professional Segment of the ExtraMOT market, a multilateral trading facility organised and managed by Borsa Italiana S.p.A., which does not impose an intermediary to act as bid/ask specialist or market maker facilitating trading in relation to the Instruments. Therefore, the Instruments may not have an active and liquid trading market and investors may experience difficulties in selling their Instruments and/or selling them at a price that will provide them with a return similar to that which may be obtained on comparable investments that have a more developed market.

Consequently, in deciding their own financial strategy, prospective investors should consider whether the maturity of the Instruments is in line with its future liquidity requirements or needs.

Risks related to the market generally

Set out below is a brief description of the principal market risks, including interest rate risk and credit risk:

The secondary market generally

Instruments may have no established trading market when issued, and one may never develop. However, even if a market does develop, it may not be very liquid. Therefore, investors may not be able to sell their Instruments easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market. This is particularly the case for Instruments that are especially sensitive to interest rate, currency or market risks, are designed for specific investment objectives or strategies or have been structured to meet the investment requirements of limited categories of investors. These types of Instruments generally would have a more limited secondary market and more price volatility than conventional debt securities. Illiquidity may have a severely adverse effect on the market value of Instruments. In addition, Instruments issued under the Programme are listed on a non-regulated market (multilateral trading facility) and, in these circumstances, pricing information may be more difficult to obtain and the liquidity and market prices of such Instruments may be adversely affected.

Interest rate risks

Investment in fixed rate Instruments involves the risk that subsequent changes in market interest rates may adversely affect the value of the fixed rate Instruments.

Credit ratings may not reflect all risks

One or more independent credit rating agencies may assign credit ratings to the Instruments. The ratings may not reflect the potential impact of all risks related to structure, market, additional factors discussed above, and other factors that may affect the value of the Instruments. A credit rating is not a recommendation to buy, sell or hold securities and may be revised or withdrawn by the rating agency at any time.

In general, European regulated investors are restricted under Regulation (EC) No. 1060/2009 (as amended by Regulation (EC) No 513/2011) (the **CRA Regulation**) from using credit ratings for regulatory purposes, unless such ratings are issued by a credit rating agency established in the EU and registered under the CRA

Regulation (and such registration has not been withdrawn or suspended), subject to transitional provisions that apply in certain circumstances whilst the registration application is pending. Such general restriction will also apply in the case of credit ratings issued by non-EU credit rating agencies, unless the relevant credit ratings are endorsed by an EU-registered credit rating agency or the relevant non-EU rating agency is certified in accordance with the CRA Regulation (and such endorsement action or certification, as the case may be, has not been withdrawn or suspended).

Legal investment considerations may restrict certain investments.

The investment activities of certain investors are subject to legal investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent (1) Instruments are legal investments for it, (2) Instruments can be used as collateral for various types of borrowing and (3) other restrictions apply to its purchase or pledge of any Instruments. Financial institutions should consult their legal advisers or the appropriate regulators to determine the appropriate treatment of Instruments under any applicable risk-based capital or similar rules.

TERMS AND CONDITIONS OF THE INSTRUMENTS

The following is the text of the terms and conditions of the Instruments (the **Conditions** and, each of them, a **Condition**). 11. Form of the Instruments

The Instruments to be issued under the Programme will be in bearer form and will be held in dematerialised form. Language of the Information Memorandum

The language of the Information Memorandum is English. Any foreign language text that is included within this document has been included for clarity purposes and does form part of the Information Memorandum.

Conflicts of Interest of the Dealers

Certain of the Dealers and their affiliates (including parent companies) have engaged, and may in the future engage, in investment banking and/or commercial banking transactions with, and may perform services to the Issuer and its affiliates in the ordinary course of business. In addition, in the ordinary course of their business activities, the Dealers and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of the Issuer or Issuer's affiliates. Certain of the Dealers or their affiliates that have a lending relationship with the Issuer routinely hedge their credit exposure to the Issuer consistent with their customary risk management policies. Typically, such Dealers and their affiliates would hedge such exposure by entering into transactions which consist of either the purchase of credit default swaps or the creation of short positions in securities, including potentially the Instruments issued under the Programme. Any such short positions could adversely affect future trading prices of Instruments issued under the Programme. The Dealers and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments. For the purpose of this paragraph the term "affiliates" includes also parent companies.

INFORMATION CONCERNING THE ISSUER'S REQUEST OF THE STEP LABEL

An application for a STEP label for this Programme will be made to the STEP Secretariat. Information as to whether the STEP label has been granted for this Programme may be made available on the STEP market website (initially www.stepmarket.org). This website is not sponsored by the Issuer and the Issuer is not responsible for its content or availability.

Unless otherwise specified in this Information Memorandum, the expressions “STEP”, “STEP Market Convention”, “STEP label”, “STEP Secretariat”, and “STEP market website” shall have the meaning assigned to them in the Market Convention on Short-Term European Paper dated 19 May 2015 and adopted by the ACI – The Financial markets Association and the European Money Markets Institute (as amended from time to time).

The status of STEP compliance of this Programme can be checked on the STEP Market website (www.stepmarket.org).
